PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building production web applications with React, Next.js, Node.js, TypeScript, MongoDB and PostgreSQL. Delivered measurable gains in performance, security and retention on multi-role platforms serving 500 to 1,000+ users. Experienced in REST APIs, authentication and RBAC, database indexing, Jest testing and LLM integrations (OpenAI, Anthropic) within Agile teams.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend:	React, Next.js (SSR, App Router), Redux Toolkit, Tailwind CSS, Material UI, Responsive Design
Backend:	Node.js, Express.js, REST APIs, JWT, OAuth2, Clerk RBAC, Server Actions
Databases:	PostgreSQL, MongoDB, Mongoose, MySQL, Database Indexing
DevOps & AI:	Docker, AWS (EC2, S3), CI/CD, Jest, OpenAI, Anthropic, RAG, LangChain, Pinecone
Tools:	Git, GitHub, Postman, VS Code, Cursor, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer Aug 2025 - Jul 2026
SensViz, Enterprise Testing & Assessment Portal | Lahore, Pakistan

- Redesigned core settings and responsive navigation for a multi-role platform serving 500+ active users, reducing user-reported navigation friction by 40%.
- Refactored React state management and component rendering with custom hooks, improving page rendering and data-loading performance by 30%.
- Built a sortable, filterable Test Library with live search across 1,200+ assessment records, reducing organizer lookup time by 50%.
- Introduced Jest unit-testing workflows across 4 release sprints, contributing to a 20% reduction in post-release production defects.

Associate Software Engineer Feb 2025 - Jan 2026
Cogilent Solutions, BrightSpyre Recruitment Portal | Islamabad, Pakistan

- Enhanced a Next.js recruitment platform serving 1,000+ monthly active users, increasing average session retention by 20%.
- Implemented Clerk role-based access control (RBAC), reducing unauthorized API endpoint requests by 30%.
- Reduced production bundle size by 25% through dynamic code splitting and asset optimization, raising Google Lighthouse performance scores by 18 points.

MERN Stack Developer Intern Aug 2024 - Oct 2024
IIFATECH | Lahore, Pakistan

- Developed a full-stack responsive job portal in an 8-week Agile sprint using React, Node.js, Express and MongoDB, processing 200+ candidate applications.
- Implemented JWT authentication and server-side request validation for REST APIs, reducing authentication errors by 25%.

PROJECTS

DevFlow | Next.js, TypeScript, MongoDB, NextAuth.js, Tailwind CSS, OpenAI | Live | GitHub

- Architected a developer Q&A platform with server-side rendering, global search, and AI-generated answers using the OpenAI and Anthropic APIs.
- Optimized MongoDB queries and Next.js Server Actions, improving question setup and lookup performance by 35%.

Equigenix | MERN Stack, TypeScript, React Hooks, MongoDB, AWS | Live

- Designed paginated assessment tables handling 500+ records with multi-field filtering and live search, cutting data retrieval time by 60%.
- Optimized database indexing and REST API execution paths, reducing average server response time by 40%.

Hair Transplant Lead Management System (HLMS) | MERN Stack, TypeScript, Tailwind CSS

- Protected 200+ active clinic user accounts by engineering secure password-reset workflows with tokens that expire after 15 minutes.
- Resolved a critical production lead-creation bug within 24 hours, eliminating manual administrative work for 30+ service providers.

AI Powered Interviewer (PrepWise) | Next.js, Google Gemini, Vapi, Firebase, Tailwind CSS | Live | GitHub

- Built an interview-preparation platform that simulates real interviews with voice interaction and generates automated feedback using Google Gemini and Vapi.

EDUCATION

Bachelor of Science in Computer Science, University of Central Punjab, Lahore, Pakistan Oct 2018 - Feb 2023
